PROJECT

Learning Management System (LMS) – Microservices System 11/2025 - 02/2026

Source code: https://github.com/dieydev/lms-microservices

- Developed a microservices-based backend using .NET 8, including Auth, User, Course, and Progress services integrated through an API Gateway (YARP).
- Implemented secure authentication and authorization using JWT, RBAC, Google OAuth, refresh tokens, and OTP-based password recovery.
- Built core learning features such as course management, enrollment, lesson tracking, and progress management; applied Redis caching to improve performance and reduce database load.
- Integrated MoMo and VNPAY payment gateways with HMAC signature verification and asynchronous IPN/callback handling for automated enrollment workflows.
- Explored asynchronous communication with Kafka by publishing domain events for selected workflows and inter-service messaging.
- Containerized services and infrastructure (PostgreSQL, Redis, Kafka, API Gateway) using Docker Compose to ensure consistent local development environments.

Spicy Noodle Ordering System (ASP.NET MVC 5) 04/2025 - 07/2025

Source code: https://github.com/dieydev/DuAnMiCayy

- Developed a full-stack food ordering platform using ASP.NET MVC 5 with separate Client and Admin modules.
- Implemented authentication with RBAC, BCrypt password hashing, and OTP-based password recovery.
- Built checkout and order management workflows with transaction handling, pagination, and logging.
- Enhanced UI/UX using AJAX, Bootstrap, Chart.js, and PDF reporting.

SKILLS

Programming Languages:	C#, JavaScript.
Backend:	ASP.NET Core, FastAPI.
Frontend:	ReactJS, TailwindCSS, HTML/CSS.
Database:	PostgreSQL, MySQL, SQL Server.
Tools:	Docker, Docker Compose, Git, Postman.
Languages:	English (Intermediate - TOEIC in progress)

EDUCATION

Thu Dau Mot University 08/2022 - Present

Major: Software Engineering

Expected Graduation: June 2027
